

STATIC DISCHARGE PALMPLATE Z103P

The Grounding PALMPLATE is a convenient and quick solution to ensuring that there is no charge on the Human Body before entering any ESD safe area. It has a conductive Stainless Steel electrode plate mounted onto an acrylic backing.

The plate can be mounted on the wall at a convenient height and the personnel have to just touch the plate to drain any charge from the body.

The Plate is supplied with a Grounding cord which needs to be connected to any ESD earth point. A 2.2 megohm resistor is provided in the ground cord as precaution against risk of shock.

Specifications

Material : Stainless steel on Acrylic backing
Finish : Brushed effect
Dimensions: Touch Plate 150 x 150 mm
Weight : 500 gms
Decay Time : < 2 secs
Resistance to Ground: 2.2Mohm
