

Have you noticed how clean and fresh the air feels after a thunderstorm?

That's because lightning energises the air by **IONIZATION**. In nature, **IONS** are generated by sunlight, lightning, ocean waves, and waterfalls. Ionaire re-creates this indoors, leaving the air clean, fresh and free of pathogens.

Product Range

Particle Size is critical

80% of the air pollutants are less than 1 micron in size which conventional air filters struggle to capture, **while** Ionaire can remove particles as small as **0.01** microns. Pollutants that can be removed by Ionaire, include: **viruses, bacteria, mold, dust, pollen, cigarette smoke, odours and VOCs**

Ideal for Homes, Small offices, Shops, Clinics etc
